

Choose Connx and go Beyond the Limits of Your Phone System

Benefits of Connx Calling

Seamlessly transition your UCM solution to the cloud

With Connx Calling, you get:

- A single architecture for calling
- Flexible deployment models
- Centralized, enhanced management, reporting, and analytics
- A single global dial plan
- Centralized call routing services
- Unified user experiences

All of the Above. One Platform.

A single Connx platform. Flexible cloud transitions. Unified user experiences.

Connx provides a single calling architecture that connects the Connx Calling cloud to on-premises Connx UCM and third-party PBXs.

Take your next step to the cloud.

Learn more about how you can pave a smooth path to the cloud with Connx!

Consider the Cloud

When moving critical communications to the cloud, look for a provider that has a strong reputation, delivers its services on a proven platform, and makes continuous investments in innovation.

Also consider what your migration will look like. Find a provider that offers migration services that pave a smooth upgrade path to the cloud. If you need to preserve existing investments in workflows and integrations or devices, look for a provider that supports a phased cloud migration.

By 2025, 50% of overall telephony users will be cloud-based

The Flexibility of Connx Has You Covered

A multi-tenant, software-as-a-service cloud calling solution hosted in Connx data centers around the globe.

- Market-leading platform used by over 39 million people worldwide
- Managed through a single-pane-of-glass administration experience
- One app for calling, meetings, messaging, contact center, events, and polling
- An SLA guarantee for high availability service, to protect your business
- Secure by default, protected by end-to-end encryption, and monitored by Connx's world-class security team
- Available in 85+ countries around the world, with three flexible options to connect to the public network

Pave a Smooth Path to the Cloud with Connx

To ensure you get the cloud experience you're expecting, Connx has designed an interactive cloud migration process, where every step is completed with the end in mind.

Flexible Deployment Options for Connx UCM Customers

What if you already have Connx Unified Communications Manager (UCM) on-premises, and you want to maintain your user experience or extend the ROI on your Connx devices? You may be looking to hand off operations of Connx UCM or move to a dedicated private cloud, all while maintaining third-party integrations. If so, we can still help.

Dedicated Instance for Connx Calling

- Fully redundant dedicated cloud instance option based on the UCM architecture
- Provides UCM customers a non-disruptive, seamless migration path to the cloud

- Move to the cloud at your own pace

- Support current Connx endpoints, local survivability solutions, and custom workflows and integrations

- Redistribute users during deployment options at any time

- Keep your existing PSTN service agreements
